**Subject:** streetlight question

Hello,

I'm wondering if a streetlight can be installed on 14th Ave., somewhere between Carol Drive and Port Sheldon. There is currently a streetlight at Carol Drive and 14th and on the straight portion of Port Sheldon at 14th, but nothing in between. The darkness of this area appears to be a safety concern, especially with the curve between Port Sheldon and 14th.

Thank you,
Chad Boorsma
